

Module 2: Managing Ingredients (25 min)

Learning Objective: Navigate the ingredients library, understand ingredient details, and import ingredient data from Excel.

Lesson 4 – Understanding the Ingredients Library (7 min)

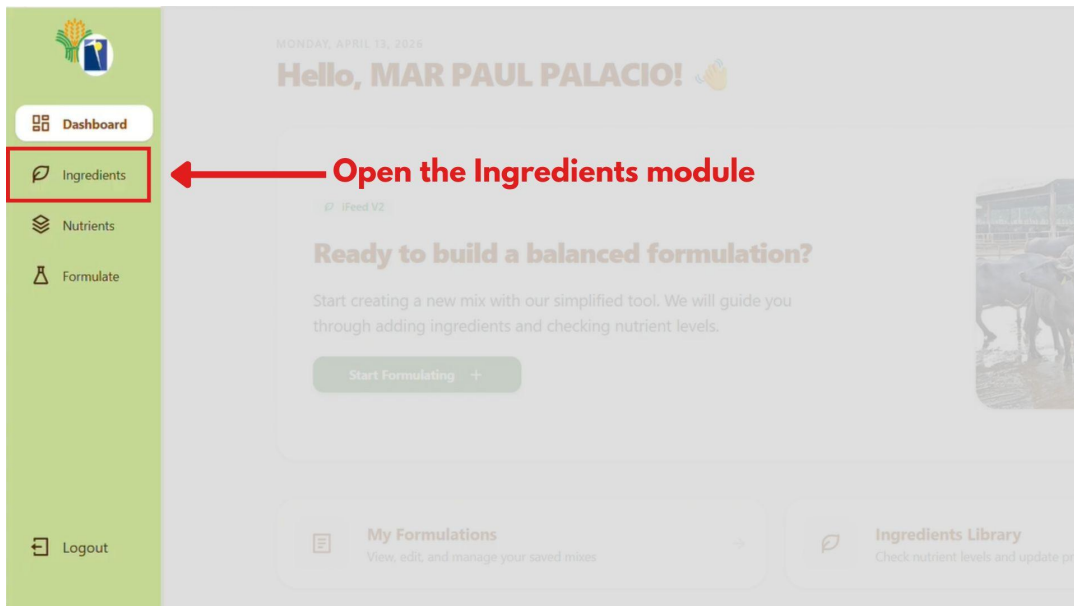

Overview

Learn how to view ingredient information including nutritional composition and availability.

Step 1. View Ingredient

Displays each ingredient's:

- Name
- Price (PHP/kg)
- Availability
- Picture (optional)
- Ingredient Group
- Nutritional Composition

Open the Ingredients module

Test Cases

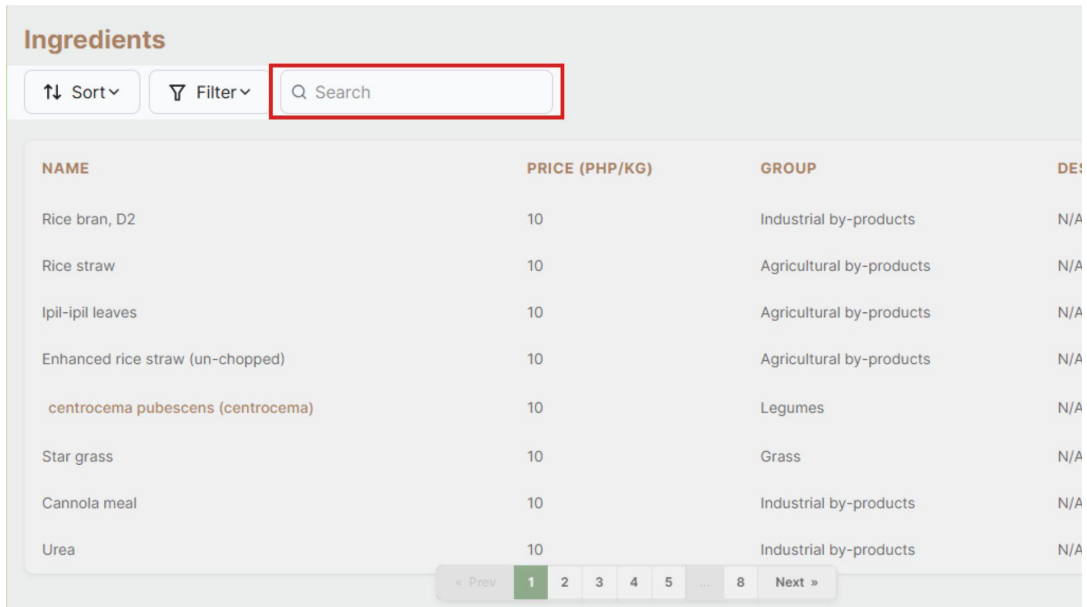

Test Case	Expected Result
Open an ingredient	Ingredient details are displayed
View ingredient nutrition information	Nutrient values are visible
View ingredient pricing information	Price is displayed correctly

Lesson 5 – Searching and Filtering Ingredients (5 min)

Overview

Use search, sorting, and filtering features to locate ingredients quickly.

Step 1. Click the Search button.

The screenshot shows the 'Ingredients' section of a web application. At the top, there are three controls: a 'Sort' dropdown, a 'Filter' dropdown, and a 'Search' input field. The 'Search' input field is highlighted with a red rectangle. Below these controls is a table with four columns: 'NAME', 'PRICE (PHP/KG)', 'GROUP', and 'DE'. The table lists various ingredients, including 'Rice bran, D2', 'Rice straw', 'Ipil-ipil leaves', 'Enhanced rice straw (un-chopped)', 'centrocema pubescens (centrocema)', 'Star grass', 'Cannola meal', and 'Urea'. At the bottom of the table, there is a pagination bar with buttons for 'Prev', '1', '2', '3', '4', '5', '8', and 'Next'.

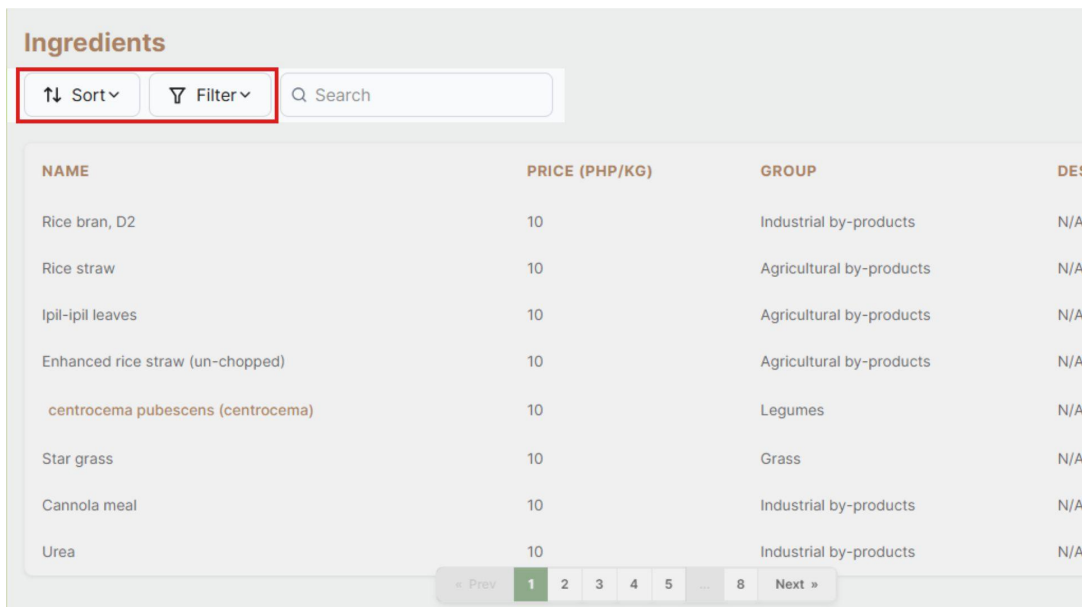

NAME	PRICE (PHP/KG)	GROUP	DE
Rice bran, D2	10	Industrial by-products	N/A
Rice straw	10	Agricultural by-products	N/A
Ipil-ipil leaves	10	Agricultural by-products	N/A
Enhanced rice straw (un-chopped)	10	Agricultural by-products	N/A
centrocema pubescens (centrocema)	10	Legumes	N/A
Star grass	10	Grass	N/A
Cannola meal	10	Industrial by-products	N/A
Urea	10	Industrial by-products	N/A

Search the ingredients list

Step 2. Enter the name of the ingredient.

Step 3. Sort and Filter

Filter the ingredient list using the Sort and Filter buttons.

The screenshot shows the 'Ingredients' section of a web application. At the top, there are three controls: a 'Sort' dropdown, a 'Filter' dropdown, and a 'Search' input field. The 'Sort' and 'Filter' dropdowns are highlighted with a red rectangle. Below these controls is a table with four columns: 'NAME', 'PRICE (PHP/KG)', 'GROUP', and 'DE'. The table lists various ingredients, including 'Rice bran, D2', 'Rice straw', 'Ipil-ipil leaves', 'Enhanced rice straw (un-chopped)', 'centrocema pubescens (centrocema)', 'Star grass', 'Cannola meal', and 'Urea'. At the bottom of the table, there is a pagination bar with buttons for 'Prev', '1', '2', '3', '4', '5', '8', and 'Next'.

NAME	PRICE (PHP/KG)	GROUP	DE
Rice bran, D2	10	Industrial by-products	N/A
Rice straw	10	Agricultural by-products	N/A
Ipil-ipil leaves	10	Agricultural by-products	N/A
Enhanced rice straw (un-chopped)	10	Agricultural by-products	N/A
centrocema pubescens (centrocema)	10	Legumes	N/A
Star grass	10	Grass	N/A
Cannola meal	10	Industrial by-products	N/A
Urea	10	Industrial by-products	N/A

Sort and filter ingredients

Test Cases

Search Test Cases

Input	Expected Result
Rice Bran	Rice Bran appears in results
Corn	Ingredients containing "Corn" appear
Invalid ingredient name	No results found message appears
Empty search field	Complete ingredient list is displayed

Filter Test Cases

Action	Expected Result
Filter by ingredient group	Only ingredients from selected group appear
Sort A–Z	Ingredients sorted alphabetically
Sort by price ascending	Lowest priced ingredients appear first
Clear filters	Complete ingredient list is restored

Lesson 6 – Importing Ingredients from Excel (Admin Only) (8 min)

Overview

Import ingredient and nutrient data using an Excel template.

Step 1. Bulk Import from Excel (Admin)

Click the Import button to import ingredients with nutrient data from an Excel (.xlsx) file.

Step 1.1

Click Choose File and select the ingredients Excel file.

Step 2. Add Ingredient (Admin Only)

Click Add New to create a new ingredient.

Step 3. Edit Ingredient (Admin Only)

Click the Pencil icon to modify ingredient information and configure heavy constraints when necessary.

Example:

- Cassava Meal $\leq$ 15% due to bloating risks.

Step 4. Delete Ingredient (Admin)

Click the Delete Ingredient button or Trash icon.

Step 5. Export to Excel (Admin)

Click the Export button to download ingredient and nutrient data.

Step 6. Search for an Ingredient

Click the Search button.

Step 7. Enter the Ingredient Name

Search for the desired ingredient.

Step 8. Sort and Filter

Use Sort and Filter buttons to organize ingredient data.

Test Cases

Import Test Cases

Test Case	Expected Result
Upload valid Excel template	Ingredients imported successfully
Upload file with missing columns	Validation error displayed
Upload unsupported file type	Upload rejected
Upload duplicate ingredient	System handles duplicate based on import rules

Add / Edit / Delete Test Cases

Test Case	Expected Result
Add valid ingredient	Ingredient appears in library
Edit ingredient details	Changes are saved
Delete ingredient	Ingredient removed from list
Add heavy constraint	Constraint saved successfully

Export Test Cases

Test Case	Expected Result
Export ingredient library	Excel file downloads successfully
Open exported file	Data matches system records

Search & Filter Test Cases

Use the same test cases from Lesson 5.

Lesson 7 – Exporting Ingredient Data (5 min)

Overview

Learn how to export ingredient and nutrient data to Excel for offline review or editing, and how to re-import updated files.
